What's New in the 4Videosoft DVD To IPhone Converter?

4Videosoft DVD to iPhone Converter enables you to convert DVD to iPhone compatible formats, such as MP4, MOV, AVI, MPEG, 3GP, 3G2, etc. Also, it enables you to split your DVD movies into chapters for your iPhone. Key Features: 1.Converts single or multiple DVD chapters 2.Source discs can be loaded either in Navigator or Parser mode. This allows users to avoid decoding errors. 3.After the DVD is loaded, each chapter is displayed as a separate item. This means that users have complete control over the output files. 4.For example, one could select only the first three tracks and skip all the others. Such flexibility is a nice feature, more-so since some discs can contain tens of items. 5.The resource can save results in a few, but common video and audio formats (MP4, MOV, WebM, AAC, AIFF, MP3, M4A and WAV). The built-in Snapshot function generates JPEG, GIF and BMP files. 6.A handful of secondary functions to customize the result 7.The program can modify some aspects of the video. Brightness, saturation, contrast and hue effects can be added and the volume can also be adjusted. This is a great feature since conversion can be combined with video and audio enhancing! 8.Trimming and cropping are also supported. And the really nice thing is that a video previewer is available. Thus, all the effects applied can be checked before actually letting any conversion take place. 9.Since applying these effects changes the original file considerably, the developers have included a watermark function. This can be done either by inserting a text string or a user-defined picture (JPG, PNG, BMP and GIF supported). 10.The interface is highly intuitive and well-suited to the job at hand. All the core functions are organized into buttons and replica menus are also available. This duality makes the tool very easy to use! 4Videosoft DVD to iPhone Converter for Mac is a very powerful DVD ripper, video converter for Mac OS X. It allows you to extract the audio track from DVDs, including DVD CSS, make copies of movies, and more. It also has some additional DVD menu ripping features. With the updated 4Videosoft DVD to iPhone Converter for Mac, you can rip DVD to iPhone 3G and 4G, 3GS and iPhone 5, iPod Touch, iPod classic, iPod Nano, Apple TV, iTouch 4G and iPad Air. Moreover, it can rip all popular DVD formats, including DVD-5, DVD-9, DVD-5.1, DVD-9.1, DVD-RW, DVD+RW, DVD-RW, and more. It is a multi-format DVD ripper with the ability to select video and audio
