KEYMACRO (Key Macro for Windows) is a tool that enables you to create Macros for your keyboard, which are reusable and automated sequences of keys that are executed with a single key. Let's say that you often type the same letter on the keyboard, like "e". Key Macro helps to automate this and use that key in a program or the time you are writing your password. KEYMACRO allows you to automate sequences of keys on the keyboard. Using KeyMacro is just a matter of creating a Macros with a sequence of keys, and all those Macros will be available in the Macro menu. KEYMACRO is not an advanced tool, but it is simple and easy to use. What makes KeyMacro different from other applications, is that the entire set of macros can be saved, and saved again and again, and from any computer, in a single file that you can import to the computers. One of the cool things about KeyMacro is that you can import keys from any language, such as the following: Microsoft: windows iphone makosx • KeyMacro is available in two editions: Standard and Professional.
