What I would like to know is how to write a performance test script. As a web developer I understand the importance of performance but I'm not very familiar with web technologies and I can't find any resources that help me do this. Any suggestions? A: Try to follow the performance lifecycle. The website design depends heavily on it. Perfomance Llfecycle Low: Basic website, no website optimization Mid: Partial Website optimization. In the Mid phase, you optimize your website. The main optimization points are: load time, bandwitdh and http headers The first thing that comes to mind is to create a test to check the bandwitdh and to which http requests it responds slow. In chrome (and some other browser), you can press Ctrl+Shift+I and choose the "Advanced Developer Tools" option. There you can see the requests to your server and the bandwitdh (on the lower right side). The second thing is the http headers. You can test that in your server by using a tool such as HttpDigger I think that most of the times, the response time is not a problem, but the extra delay due to the extra content for a user can be a big deal. In the end of the day, it is up to you. The only rule is to run a test and use the information to improve your website. Spring has sprung, at least the weather has! Time for some sweeping and cleaning and feeling of spring in the air. The yard looked so bare in the winter and is showing some signs of being transformed. This is the time to move outside. We went out to take care of all the weeds and lawn mower, which moved by itself outside to make the nice easy work. There is so much plant life that is ready to grow again. I am loving the spring. I can sit on the deck and listen to the birds singing, take a walk on the hillside, see the fields changing colors and 09e8f5149f

Advertising Read more A witness described the scene inside the store, located in the 1300 block of Pennsylvania Avenue, as “chaos” and “panic”, with people running in all directions. “The whole entire first floor of the Home Depot was in total chaos. Everything was running around — running, screaming, banging on the walls,” one woman told The Washington Post. “The police were just yelling, screaming, and they were intimidating people. They were like, ‘Let us do our jobs.’” Home Depot workers told the newspaper that the store had two entrances at the time of the incident. One led to the back-of-house area, while the second entrance led to the front of the store, on Pennsylvania Avenue. Although workers had been told that police ordered a lockdown, a Home Depot employee at the
