I don't know how to continue from here. I could multiply by $u^{-1/2}$ and get a more easier integral to solve, but I really don't know what to do next. A: Hint: Set $u = \sqrt{1-x}$ and $du = -1/2\sqrt{1-x} dx$ so that we get $dx = -2 du / \sqrt{1-x}$ A: Hint: Solve for u using $1-u=x$ and then integrate the "new" function using the appropriate limits. At the May 19 debate, the Republican nominee opposed "guaranteed minimum income," saying it would destroy "the incentive to get out of welfare" and lead to "a huge increase in bureaucracy." Later that day, he called the idea "a disaster." Obama, meanwhile, opposed the idea as "just another political gimmick" during the 2008 campaign but later said he was open to the concept after his proposals for big new government spending proposals. AD Over the summer, the Urban Institute recommended that the federal government take control of health insurance by setting minimum $3e33713323$
