Skeletons Inside is a game you're used to playing in costumes, with an eerie house and ghosts. The difference is that this time, the game world reflects your real life. In the game you are the same person who walks around in the real world, but your actions are controlled by an AI. Experience the same creepy atmosphere you normally enjoy by playing Skeletons Inside. The first time you play, you'll be setting up things so you can hide your computer and be the only one controlling the game. Then you'll be playing, encountering all the creepy elements, and then hiding in the bedroom to reset the AI. Similar to What the Dead Know, Skeletons Inside is a psychological horror game inspired by the isolation that is often felt when playing with a ghost. The enemy in the game is your nervous system. When you play, you're experiencing the sensations of running, hiding, and playing in a dream. This is a horror game that, like What the Dead Know, is about running away from your "self". Even when you are the "ghost" you are still experiencing the same fear and is suffering in the same way as you would if you were your real self. Why? Because we are all more than one body. The whole point of playing as the ghosts is to help people overcome their fear of speaking in front of crowds, or performing in front of a camera. Playing as the ghost will help you with all the fears that are felt in front of others. -Playing as a ghost forces you to confront yourself, to speak in front of others, and to study the fear and anxiety associated with different fears you may have. -In order to play, you must be able to experience fear. In order to confront your fears, you need to make yourself vulnerable and let the ghost into your skin. -When you play, you won't only be the ghost but you also play as yourself. You can use your real senses to interact with the world, while still controlling the actions of the ghost. -The ghost is a projection of the person's worst fears, and that allows you to experience the same fear as the ghost. -Skeletons Inside only uses fear as the motivation. The ghosts are still the same as you, but they don't have any memories of what they were before they were ghosts. -Some of the ghosts will play with you in ways that you might not expect. This was made to reflect how abnormal experiences can become

### **What's new:**

**- Includes... \$49.95 Product Description: Iron Rain Tactical Mask - Iron Rain's Tactical Masks are the highest quality, shortest-nose tactical masks on the market. There are 3 configurations to choose from that fit comfortably on your face, and the mask body can be removed for easy cleaning. Turner's Tactical Masks - If you are wearing a gas mask, you should be wearing a military gas mask. The Turner Tactical Masks are fully compatible with your military gear, and the mask body can be removed for easy cleaning. The IRON RAIN Mask-This is a quality product. It has minimal flex and fits comfortably. It did, however, require a new upper domal pin to get it to seal tightly. The metal insert on the top was worn away so I used a small amount of epoxy in the slot, scrubbed it clean and it held tightly after. Then, I replaced the pin. I think the problem was caused by the material being specifically designed for concealment clothing, which explains the weight. Due to the material from which it is made, it is also very breathable. I found it to be totally**

acceptable despite that. My long term experience from this purchase is that it works as advertised. I also like the "Storm Eye protection" (yes, I know there is no 'e' in Eye protection) on the front of the mask that protects you from flying insects and contaminants in the air. My only real complaint about this product would be that it is tiny on a large face. My face has to be exactly 6" across front to hold it in place. It does stay in place quite well, but to seal, it would probably need to be a couple of inches on the sides as well to accommodate a truly chunky (not someone with a tiny face in proportion to their head). If I had known this in advance, I probably would have purchased a larger size in order to have a more effective seal.
