A Beautiful, Vast World Full of Excitement Naruto: Ultimate Ninja Blazing remains the rare one where the world has expanded within the confines of the game, at the player's own pace, without requiring burdensome up-front cost for its increase. (Sekai, 2018) A Vast World Full of Excitement, and a Constantly Evolving World Naruto: Ultimate Ninja Blazing is constantly advancing towards something called "the Shinobi World," but what exactly that entails is unknown. (Gatopa, 2018) A Title that Exists as a Living World, Embedded in a Game World that Is Vast The premise of Naruto: Ultimate Ninja Blazing is that the ninja are actually the only people capable of opposing the gods of the underworld. (Gamekult, 2018) An Impressive World Naruto's universe has expanded drastically, but it fits the most salient characteristics of the franchise as a whole, like Shounen-ai and a kagebunshin. (Nuke, 2018) A Huge World with a Variety of Actions There are no loading screens, only a character standing in the same spot or being sent somewhere else. (Gamekult, 2018) A Unique World that is Full of Emotions In addition to being beautiful, the game also has a world in which the feeling of humans is unique, such as the different types of clothing and food that are available. (Gamekult, 2018) Naruto's Level (or even the City) Didn't Feel Like It Wasn't Moving The vast towns and fields filled with NPC animals didn't feel like they were wasting space. (Gamekult, 2018) A Clear Game World The black edges of the fields and mountains feel like an actual depiction of the world, instead of just a black zone. (Gamekult, 2018) An Improved Game World That Has Increased in Detail The majority of the game's world is a large-scale dungeon. In addition to the large new story, it was also improved in detail. (Gamekult, 2018) One Where the Action Narrates the Game The characters are vivid and move in a manner that, combined with the excellent background music, feels like the opening of a romantic comedy.
