“I first experienced the hype about this new FIFA feature when I first saw some videos of the FIFA demo where players were in full-speed motion, making it so natural and dynamic that I was blown away,” said John Pickles, Head of FIFA Creative. “Today we are excited to offer fans who play FIFA 15 with FIFA 22 Dynamic Difficulty an easy and entertaining way to play with even higher intensity.” HyperMotion provides additional on-field tactics that were not possible before, such as double teaming an opponent and breaking the opposition’s play by pinning one of them to the side line. If the player is well-timed, the opposition will be forced to find a new play and lose possession. All players on the team are affected by being on the side line or pinned. If the player is not alert, they will be disoriented and won’t last much longer. Challenges for Pro, Master and Casual modes have been adjusted in FIFA 22. Pro Hindering Dribbling: By challenging a player to dribble diagonally from the right side of the penalty area to the left, the player is obliged to execute an appropriate dribbling technique from an initial, unreliable and weak placement on the right side of the penalty area. Further Destroying Flanker/Centre-Back: By challenging a player to dribble diagonally to the left flank, the player is obliged to execute an appropriate dribbling technique from a powerful, erratic, unpredictable and dangerous position on the edge of the penalty area. The strength of the attack places further strain on the defender, allowing a higher percentage of goals. Further Destroying Flanker/Centre-Back and Opponent-Defender: By challenging a player to dribble diagonally to the left flank, the player is obliged to execute an appropriate dribbling technique from a powerful, erratic, unpredictable, dangerous and defensive position at the edge of the penalty area on the left flank. The strength of the attack places further strain on the defender, allowing a higher percentage of goals. Further Destroying Centre-Back: By challenging a player to dribble diagonally from the left flank to the right, the player is obliged to execute an appropriate dribbling technique from a powerful, erratic, unpredictable and defensive position on the left flank. The strength of the attack places further strain on the centre-back,
