Just Arms is a physics platformer with limited controls. You will have to spin your arms and charge up enough force to then punch yourself in the opposite direction. One mistake and you're back down at the bottom! In this game, there is no health bar, so you'll have to watch out not to mess up and get destroyed. The physics in the game are a bit predictable, so there are certain areas where you can predict when you might jump. This means you'll have to pay careful attention to the area you are in, especially the up jump area. Since there are no health pickups, you'll need to find other ways to heal up. The main goal is to go as far as possible in the game. After each level you will unlock various items that will help you on your journey. Each item will increase your play time, and if you're really good with your new ability you might unlock special skins, which you will also unlock over the course of the game. Remember! The faster you get to the top, the more points you'll get!
