#### What's New In AutoCAD?

Add markup and text-based notes to your drawings. A new set of glyphs, called Quick Reference Marks, helps you navigate your drawing. Also, there is a new type of mark you can place on your drawings. It's called a grid mark. (video: 2:02 min.) Non-Destructive Revisions: Take back control of a drawing. In AutoCAD 2023, when you undo a move command, it isn't actually removed from the drawing. Instead, it is removed from the drawing and you can edit the move again without disturbing the original drawing. When you perform non-destructive revisions, you can change the values of points, linetypes, and linetype sets. To make changes, just click on a point or a line. You can change a point's length or width, or set a linetype and select from a number of predefined set values. The changes are made without changing the drawing permanently. (video: 2:35 min.) Power Traces: Like a drawing camera, the power trace allows you to view your drawing from different vantage points. The point and line set, dimension point, and text frame are three types of marker that are included in this feature. Linking From the Labels tab: Speed up your work with the new LabelLink tool. Once you've created a label with the LBLTOLB tool, simply use the LabelLink tool to create a copy of the label. You can now edit it as if it were a complete drawing object. (video: 1:55 min.) Editing Dimensions: Quickly and accurately edit dimensions. This tool allows you to make changes to a dimension without dragging it across the drawing. In addition, a new tooltip can provide context on the data being edited. (video: 1:48 min.) Adding Projection Templates: With Projection Templates, you can easily add complex projections to a drawing. The drawing is opened and one of the following templates is added to the drawing. You can then adjust the settings as needed and save the drawing for future use. (video: 3:36 min.) Map Layers: Use Map Layers to add an additional level of context to your drawings. For example, you can place a layer on top of a basemap layer,
