Overlord Zetta is the first and only Overlord in the history of Makai Kingdom to lead his people to victory against an entire army of enemies! And even though it has been five years since this happened, every time he's summoned as a Hero, the moment his spirit touches down on the battlefield, his legacy grows stronger than ever and the confidence he builds with each subsequent appearance becomes more powerful than ever before. This pattern of complete dominance was broken, however, by a fearsome invasion led by an army of Dsks while en route to the capital city of Merugod. The entire Netherworld was completely wiped off the map, and Lord Zetta's Netherworld was on the brink of being taken from him as well. What he has to offer you, my hero, is your chance at redemption. How can I be so sure? The destroyer of Netherworlds is back, and he's aiming to take over our land, too. Can you save the world as one of the strongest heroes in the history of mankind and get a second chance to save your daughter? What are you waiting for? **GAME FEATURES** • The first-ever Overlord and Hero Game • An extremely detailed but easy to use interface • Full body action on the battlefield • A battle system based on the turn-based model • Summon your units via the INVITE system to do your bidding • Battle system designed by Overlord Zetta • Summoned units can attack at will • Fight against enemies using various types of characters • Contains all scenes of Overlord Zetta: Hero of the Netherworld **A CORPORATE PROFILE** This is a beautifully rendered 3D game based on one of the most well-known manga in the world.
