A brief exposure of rat peritoneal mast cells to anti-IgE resulted in a transient increase in the number of active, secreting cells. The increase was also dose dependent. When mast cell responsiveness to anti-IgE was studied in the absence of calcium, ATP-induced contractions of mast cells were enhanced. 2-DG and AMP-PNP, but not beta-glycerophosphate or AMP, mimicked this effect. In the presence of AM

Washington Senator and 2020 Democratic presidential candidate Elizabeth Warren unveiled a plan on Monday to make reparations a more prominent issue in the United States. The Massachusetts senator unveiled a plan that she claimed could begin to address racial and economic inequality in the United States. In a speech in Washington, Warren compared her plan to existing government programs to pay women, racial minorities and the LGBT community for their past experiences of discrimination and racism. The senator also said her plan would not involve money from the federal budget. The plan by Warren — the first announced by a 2020 Democratic presidential candidate — would use executive actions and legislation to make the nation's legacy of racism and white supremacy a central focus of the
