What's New in the Sconcho?

sconcho is a Python program that assists knitters in creating knitting charts with an easy to use graphical interface. sconcho help Usage: sconcho [options] [chartfilename] Arguments: chartfilename -- A file to be created. Options: -d -- Turns on debug output. -h -- Shows available help options. -v -- Prints the version information. -h -- Shows available help options. sconcho can create a knitting chart from any graphic image. It uses a grid of squares (rows and columns) and creates a grid for the chart. The grid used to be a rectangle, but because of its appearance it can be confusing. The new grid is simple to use and more consistent with other Knitting applications. The new grid also minimizes the number of rows and columns needed in a chart. The grid placement also facilitates the accuracy of measuring the rows and columns of a chart. sconcho can create charts based on user supplied chart parameters. The following chart parameters can be supplied as the name of a text file. Note the following parameters do not allow you to create multiple charts from a single source. You will have to manually select a different chart source for each chart. The following table lists the chart parameters, their types and their default values. Chart parameter name Description Type Default xLeft The leftmost column of the grid. An integer. 1 yTop The topmost row of the grid. An integer. 1 xRight The rightmost column of the grid. An integer. 1 yBottom The bottommost row of the grid. An integer. 1 xScale The size of a unit square as a percentage of the screen. An integer between 0 and 100. 50 yScale The size of a unit square as a percentage of the screen. An integer between 0 and 100. 50 xOffset The distance between the grid and the text. An integer. 20 yOffset The distance between the grid and the text. An integer. 10 xOffsetPercent The distance between the grid and the text as a percentage of the screen. An integer between 0 and 100. 50 yOffsetPercent The distance between the grid and the text as a percentage of the screen. An integer between

System Requirements:

Windows: Internet Explorer: 10 or higher DirectX: Version 11 System Requirements: OS: Windows 7 SP1 or higher.
