Reassurance of the effects of small changes in a measurement; the power of a diverse, opinionated sample size. Developers of drugs and medical devices must get scientific evidence that these products are safe and effective. Accuracy will be critical to their success. Such products are often overseen by the Food and Drug Administration (FDA), which conducts a series of tests, from safety to efficacy, to determine if a product is safe, effective and appropriate. The agency also evaluates new drugs for safety, and completes a post-marketing surveillance study to collect additional, timely information about the safety of approved drugs. Although the FDA can be criticized for not being fast enough to respond to scientific c6a93da74d
